Subject: Microsoft Settlement

I applaud you for your settlement with Microsoft. The settlement is fair and in the consumers' best interests.

Microsoft may dominate the desktop market, but the PC is no longer the paradigm for computing. Thus, the anti-trust case has become almost a moot point.

Government intervention would have undoubtedly shaken the software industry. In a time of economic uncertainty, drastic remedies may not be the best medicine.

As a software engineer, I may not like Microsoft. But I approve of your settlement nonetheless. Thank you for your efforts.

Sincerely,

Jeffrey Liang
